Numilsan Initial Milk 1 is specially formulated to meet the nutritional needs of babies from birth and can be fed in addition to breast milk or as the sole food. Numilsan With the introduction of complementary feeding, we recommend switching to Numilsan 2 after the 6th month.
Product description short	Numilsan Initial Milk 1 can be fed from birth - in addition to breast milk or as the sole food.
Claim Headline	For the sake of your baby
Claim copy	Numilsan Initial Milk 1 from birth.
Additional text	<p>Well packed Safe: safety closure outside, protective membrane inside and reinforced bottom protect the milk powder all around. Hygienic: Minimized skin contact with the milk powder due to extra large opening. Very good protection against moisture due to resealable lid. Practical: One-handed handling of the packaging facilitate preparation.</p> <p>Well stored: Packed under modified atmosphere. Filling level technically conditional. Please keep the original sealed package in a cool and dry place. The Close opened package well after each use and use up within 3 weeks. Shelf life in original sealed container: see bottom imprint.</p> <p>Well disposed: The quality and safety of our products are paramount. Our packaging also contributes to this. Through the separate disposal of the individual components into the yellow recycling garbage can, you support us in our responsible approach to the environment and increase the recyclability of the material.</p> <ul style="list-style-type: none"> - Spoon separately in the recycling garbage can - Cut off membrane foil - Press the package firmly in the middle, remove the blue lid

Brand texts	
Important notes	Breastfeeding is the best nutrition for your baby. Talk to your pediatrician or midwife if you want to use an infant formula. Don't leave your baby to suck on the bottle all the time. Like breast milk, infant formulas contain carbohydrates that can cause dental damage from tooth decay if they come into frequent or continuous contact with teeth.
Storage	Store in a cool and dry place.
Durability	The original sealed package is stable at least until- see bottom imprint. Once opened, consume within 3 weeks.
Technical notes	Packed under modified atmosphere. Filling height technically conditional.

Preparation	
Content corresponds	1 package of Numilsan Initial milk 1 (800 g) = 56 bottles of 100ml each
Preparation	<p>Follow the instructions when preparing baby food: thoroughly clean the bottle, nipple and ring. Prepare each meal fresh. Feed immediately and do not reuse leftovers. Incorrect preparation and storage can lead to adverse health effects.</p> <ol style="list-style-type: none"> 1. Boil water, cool to 50° C and pour half into a clean bottle. 2. Remove the powder with the measuring spoon provided, scrape off the powder on the scraper edge and fill the required quantity into the bottle. 3. Close bottle and shake vigorously immediately, then add remaining water and shake vigorously again. 4. Attach teat and check contents for drinking temperature (37°C). Do not heat in the microwave (risk of scalding)!

Dosage	
The right dosage - for your child's nutritional needs. Please use only the measuring spoon from the package (holds approx. 4.7 g). The indicated drinking amounts are only guidelines and may vary individually, because every baby is unique.	

Baby age	Water (ml)	Quantity measuring spoon	Ready to drink food (ml)	Bottle meals per day
